

User Manual

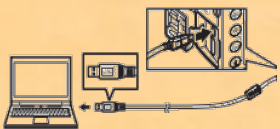

Welcome to BUPT Smart Home

BUPT smart home is a streamlined, yet powerful smart home system. The prototype showcases electronic devices (sensors, displays, etc.) and smart home web applications for monitoring and control for safety and comfort purposes.

User's Guide

The chapters in this document describe the features of BUPT smart home and provide easy-to-follow instructions for using smart home.

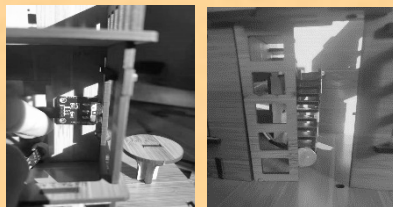

■ Humidity and temperature measure and display.

Place the smart house flat on a horizontal table and connect the USB cable and power supply.

The temperature and humidity sensor will be automatically turned on. Select to view the temperature and humidity sensor on the web page.

■ Check door and windows.

The windows and doors in your smart home are controlled by collision and infrared sensors to open and close and their status is monitored in real time by the IoT server.

Whenever you try to close and open a door or window, a record of your actions is available within the IoT server.

■ Choose the model of LED.

- choose leaving home alarm mode, when a person is detected and the light is turned on, the buzzer will sound an alarm.
- choose automatic adjustment mode, the light will automatically adjust the brightness according to the brightness of the environment.
- more function could be discovered

Use Bluetooth to select the light and combination, click the button of the Bluetooth port to select the appropriate mode.

■ More functions

This product contains lots of functions, in order to learn more about the applicable functions, please find the detailed operation guide on the official website.

Caring and Maintenance

When the smart house will not be used for an extended period, remove the battery and store it in a cool, dry area with the terminal cover in place. To prevent mold or mildew, store the camera in a dry, well-ventilated area.

- Use only component approved for use in this home.
- Do not expose the component to flame or excessive heat.
- Keep the component terminals clean.
- Turn the product off before replacing the component.

If you cannot solve the problem or cannot use it, please contact us in time!

Welcome Smart Home

User Manual

Login interface

This is our login interface. On this interface, you can log in, register, retrieve your password, etc. in addition, you can also view the user agreement.

You can manage users here !
